Kitchen is powerhouse of your family

let's add zing to your kitchen interior with vastu

KITCHEN reflects the soul of family members

As the kitchen forms an integral part of the house, the science of Vastu shastra steps to enhance the aura of the kitchen, taking into consideration certain essential elements. These include the direction, in which the kitchen is located, placements of the windows and doors in the kitchen, location of the kitchen in the house, placement of electronic gadgets, gas cylinder, refrigerator and even the sink.

PLACEMENT OF KITCHEN IN THE HOUSE

Ensure that your kitchen doesn't share a wall with the toilet or bathroom. Plus, in multi-storey homes, it is important to ensure that the kitchen is never made below a bathroom or toilet.

KITCHEN reflects the soul of family members

As the kitchen forms an integral part of the house, the science of Vastu shastra steps to enhance the aura of the kitchen, taking into consideration certain essential elements. These include the direction, in which the kitchen is located, placements of the windows and doors in the kitchen, location of the kitchen in the house, placement of electronic gadgets, gas cylinder, refrigerator and even the sink.

PLACEMENT OF GAS STOVE AS PER VASTU SHASTRA

The cooking gas is almost as essential as the placement of the kitchen in the house. Therefore, it too should be in the south-east direction. This is because when a person cooks food they should be facing to the east only.

PLACEMENT OF REFRIGERATOR AS PER VASTU SHASTRA

If the kitchen houses the refrigerator then it should be placed in the south-west direction but be kept at least a foot away from the corner. Avoid placing it in the north-east direction.

KITCHEN FLOORING AS PER VASTU SHASTRA

Ceramic tiles, marble or mosaic are great options for kitchen flooring. They are practical too as they are hard, impermeable and of course, resistant to scratches.

USE OF COLOUR AS PER VASTU

Avoid using the colour black in the kitchen and opt for vibrant colours such as yellow, rose, chocolate brown, green, orange or red.

PLACEMENT OF ELECTRICAL APPLIANCES AS PER VASTU

The cooking gas is almost as essential as the placement of the kitchen in the house. Therefore, it too should be in the south-east direction. This is because when a person cooks food they should be facing to the east only.

PLACE THE SINK AND TAPS AWAY FROM THE COOKING GAS

Sinks and taps in the kitchen indicate flowing water. They should be placed in the north-east direction and away from the cooking stove. This is because fire and water are opposite elements and they repel each other.
